TO REOPEN McPHERSON CASE

Action to Have Helen Mattern McPherson Named as Co-defendant Has Been Started

Initial steps to have Helen Mattern McPherson named as co-defendant with her husband, Hon. O. L. McPherson, in the suit alleging collusion and asking nullity of the divorce decree, between Mrs. Cora McPherson and the minister were launched by George H. Van Allen, K.C., before Mr. Justice Ford in Supreme court chambers on Thursday morning.

Mr. Van Allen who is acting for Mrs. Cora McPherson, former wife of the provincial minister of public works, was successful in being allowed to enter his motion, which if agreed to by the court when it comes up for hearing in the fall may result in Helen Mattern McPherson being called to enter her defence in the suit started by the first wife. The present wife of Mr. McPherson did not testify at the hearing of the case, which lasted three weeks and provided some of the most sensational evidence ever heard in an Alberta court.

Mr. Justice Ford dismissed the action brought by Cora McPherson in a judgment handed down a few days ago, reserving the matter of costs and also an application under the Domestic Relations Act for the return of the children of the marriage to the court.

When Mr. Van Allen appeared before Mr. Justice Ford on Thursday, however, he asked for postponement of the formal entry of the judgment until the end of the long vacation, some time in September.

Here is the formal order handed down by Mr. Justice Ford at the end of the hour-long argument on Thursday, with Dixon Craig appearing for Hon. O. L. McPherson.

McPherson vs. McPherson. Order of Mr. Justice Ford, Thursday, July 20, 1933: The entry of judgment will be postponed until after disposition of the motion to add to and amend, of which notice has been given for Monday next without leave. I now give special leave for the launching of the motion nunc pro tunc (for the time being) and adjourn that motion until some time in September next, to be arranged for after the return of Mr. Woods and Mr. Maclean.

Sidney B. Woods, K.C., and Neil D. McLean, K.C., chief counsel respectively, for the minister and his first wife, are both away on extended holidays at present.

Now comes the motion launched by Mr. Van Allen: "Take notice that an application will be made upon behalf of the plaintiff (Mrs. Cora McPherson) before Mr. Justice Ford in chambers, or in the event of his absence, before the presiding judge in chambers, at the Court House, Edmonton, on Monday, the 24th day of July A.D. 1933, at the hour of

Question Action of Hon. Lymburn

Action of a unique nature in legal circles is pursued in a statement of defence filed recently by George H. Van Allen, W.C., solicitor for the defendant in a pending divorce suit. Mr. Van Allen pleads that the statement of defence filed by the plaintiff should be struck out and the action stayed or dismissed by the court on the grounds that it is scandalous and under the circumstances may tend to prejudice, embarrass or delay the fair trial of the action by reason of the fact that Hon. J. F. Lymburn, attorney-general of Alberta, as a member of the legal firm of Lymburn, Reid and Cobbold, is one of the solicitors for the plaintiff.

As a member of the executive council of Alberta, the attorney-general recommended the appointment in 1927 under the authority of legislation of G. B. Hemwood, K.C., as deputy attorney-general and King's Proctor.

It is the duty of the King's Proctor to instruct counsel to argue for the court any question which the court deems necessary or expedient in divorce proceedings before the decree nisi is made absolute, the defence statement reads. The latter may take such steps as the attorney-general may feel is necessary where collusion is suspected by the parties to the action and may intervene, retain counsel and subpoena witnesses to prove the alleged collusion.

In this particular action the plaintiff was called to the witness stand at securing the required statutory evidence necessary for divorce, according to the statement of defence.

In his capacity as solicitor and counsel for the plaintiff, the attorney-general is in conflict with his interests and duties in his capacity as his majesty's attorney-general for Alberta, the statement of defence alleges.

Cora McPherson Gives Statement

To the Editor,
The Western Globe,
Lacombe, Alberta.

"Filled as I was with the hope that Mr. Justice Ford would make an order annulling the divorce and restoring me to my marital rights as a wife, and to my four sons, whom I love with a mother's affection, it came as a great shock to me to find that His Lordship has dismissed my action entirely. The shock of the judgment is softened only by the many expressions of sympathy that have poured in to me from all parts of the Province and from all classes of people.

Without any funds of my own, and dependent on charity and public relief and what meagre earnings I can contrive, it would be impossible for me to bring my case before the Court and the bar of public opinion except for the kindness and generosity of the women of Edmonton and others who, in my hour of need, supplied the means to pay some of my Court costs and witness fees and to petition the Court. To my counsel, Mr. Neil D. Maclean, K.C., and Mr. G. H. Van Allen, K.C., I am doubly grateful for their valuable legal services on my behalf, though the funds as my disposal have not as yet permitted me to pay their counsel fees in the lengthy suit.

I am advised by counsel that in a case of this sort, and with the evidence on the record, there is every likelihood that a higher Court may take an entirely different view from that arrived at by Mr. Justice Ford, and that I can hope to secure a judgment which will re-estate me in my home and restore me to the society of my children and entitle me to receive support in keeping with my husband's position in life.

I have in the sacrifice I made lost everything that a woman holds dear—home, husband, children, friends, protection and love. I am denied any financial recognition for my help to my husband in the long years when I aided him from his lot as a poor homesteader to realize his ambition as a man of means and a Minister of the Crown. I have nothing left in life but the goodwill of those who aided me in my efforts to claim my rights as a mother, and as a woman who made a sacrifice.

There is not an atom of truth in a story being circulated to the effect that my husband has settled a substantial sum of money on me. The

Overthrow By Force

The first sharp division of opinion at the G.C.F. convention, now in progress at Regina, was precipitated by a motion to delete from the manifesto prepared by the provisional executive declaration: "We do not believe in change through violence."

The pacifist forces won.

A division on this question was bound to come at the convention, in view of the fact that there are two distinct schools of thought in regard to the question of violence. One school believes that Capitalism is maintained by force and therefore can only be removed by force; the other holds to the point of view that force never advances any cause and that radicals must seek to gain their ends through constitutional methods.

First of all, let us say that the convention was extremely wise to squish any open advocacy of force, if for no other point of view than that of political expediency. To have admitted, even tacitly, that force might be necessary to achieve their objectives would have opened G.C.F. members up to a devastating cannonade from the other parties, who are determined either to ridicule the new party into oblivion, or to paint its supporters as dangerous radicals.

As far as the use of force is concerned (regarded as a general problem and without reference to any party in Canada) the situation is not to be quite simple. As long as the democratic channels for reform remain open, as long as it is constitutionally possible to bring about radical reform, utilization of force is to be condemned; if, on the other hand, those channels be closed up and force be used to impede constitutional progress, then use of force to overthrow existing institutions become justified.

In Germany, for instance, constitutional government has ceased to exist and the revolutionary elements in the community are maintaining the status quo by force; therefore it has become justified to use force to overthrow those elements—since without their removal no satisfactory change can be effected, and if change ceases a community stagnates.

If a Fascist government ever came into being in Canada—the sort of government which is contrary to all that we have been taught to admire—it would become ethically justified to mobilize a revolution. But, as long as a constitutional means of righting ills exists, use of force is worse than a crime—a blunder!

FARMERS' DAY AT OLDS

A Field Day has been arranged for Saturday, August 6th, at the Olds School of Agriculture. This will afford a splendid opportunity for a picnic holiday before harvest gets under way. Grain crops will be at an interesting stage of development, orchards, gardens and grounds will be open to inspection with competent guides. The herds of Shorthorn and Ayrshire cattle, Yorkshire hogs, Percheron horses and Shropshire sheep will be on display.

The school buildings, laboratories, and equipment can be inspected by old friends and new, particularly those who have sons and daughters who are interested in courses in Agriculture or Domestic Science.

Several outside speakers are expected.

Those bringing back lunches will be able to get tea, coffee and milk at the school.

THE CHURCH OF ENGLAND IN CANADA

Dioecesan of Calgary
St. Cyprian's Church, Lacombe
Rector: The Rev. T. H. Chapman
Lay Reader: Edwin H. Jones, Esq., K.C.

Organist: Miss K. C. Walters, B.A., B.A.T.C.M.
Assistants: Mrs. N. J. Glasgow and Miss Inskip

July 30th, 7th Sunday after Trinity (6th Sunday in the Month, Rector at home all day):
11:00 a.m. Holy Communion and Sermon.
7:30 p.m. Shortened Evensong and Sermon.

The regular monthly meeting of the Rector, Wardens and Vestrymen will be held after the Evening Service.

St. John's Church, Clive
Next Service 11 a.m. on Sunday, August 6th. Holy Communion and Sermon.

BOOSTS PIONEER FLOUR

"I notice in the Western Globe that others are using Pioneer Flour with satisfaction. May I say that I have been using Pioneer for the last three months and can truthfully say it is better than any other flour I have ever used, and I can recommend it to the best cooks or bakers."

Mrs. W. B. Swanson.

Peace Pacts

London.—The most important outcome of the World Economic Conference, so far, is that which it did not set out to achieve, namely, the peace of Eastern Europe. In fact, the fact was accomplished behind its back and the conference hardly noticed it. Yet if the international assembly that has sat in the Geological Museum here for an eventful month or so, had not been called together the fact which the Times described as a distinct gain to European stability, might never have been signed.

The agreement is in the form of a convention for the definition of what constitutes aggression between states. It might lead to war. It has been promoted by Soviet Russia as part of her policy of peace towards other countries, and it has now been signed by Afghanistan, Persia, Estonia, Latvia, Poland, Rumania, Lithuania, and Turkey, in a word all the states whose frontiers anywhere adjoin Russia's, except India and China.

All these states agree that the outlawry of war as imposed by the pact of Paris prohibits aggression of any kind by one country towards another. Therefore, they consider it necessary to define just what they think aggression to be "in order to preclude any pretext for justifying it."

As their definition is likely to play a big part in future discussion on peace, it is worth giving in full. An aggressor is defined as that nation which:

1. Declares war on another state.

2. Invades by armed force the territory of another state, even without a declaration of war.

3. Attacks by its land or sea forces or from the air, even without the declaration of war, any territory, vessel or flying machines of another state.

4. Establishes a naval blockade of the coasts or ports of another state.

5. Gives support to armed bands, which, organized on its territory, shall have invaded, or refused, in spite of the demand of the invaded state to take on its own territory all the steps in its power to deprive the bands of all aid and protection.

The pact also lays down that "no consideration of a political, military economic or any other character shall serve as an excuse or a justification of aggression. Furthermore, no act of aggression shall be deemed to be justified by the international condition of any kind or its international conduct."

These provisions are clearly intended to cover such contingencies as Japan's invasion of China and the "Nazis" support of "armed bands" such as those who have been making trouble in Austria for Dr. Dollfus, the chancellor. In fact, the pact taken together may be regarded as something of a diplomatic triumph, for the Soviets for they have at a single blow protected their whole European frontier, settled by means of letting it rest in abeyance their quarrel over Bessarabia with Rumania, and gained the friendship of Poland, and in the political sense, that is, against possible friction with Germany.

"The Union of Socialist Soviet Republics," says the Times, "can now turn to the Far East without the anxiety that its absorption there might be exploited in the west. Similarly the neighbors of Germany, should they become involved in conflict with Nazi bands, will not feel that Soviet Russia is going to snatch advantages out of their embroilment."

M. Tikhonoff, the foreign minister of Rumania, with Mr. Litvinov, seems to have been the prime mover in these successful negotiations. They are to be congratulated on their initiative which other states are invited to follow.

Actually, the pact reinforces the prospects of peace and the abolition of war between 265,000,000 people. It has been hurried to a conclusion largely because of the fear in Poland and Central Europe of what Herr Hitler, once he has accomplished his plan for a Fascist Fatherland, may do in the sphere of foreign affairs.

True, Germany itself has prolonged her treaty of friendship signed in 1922 at Rapallo with Soviet Russia. In this treaty both countries agreed to renounce all claims of war indemnities and Germany gave up all claims of compensation for losses incurred by German citizens in consequence of the Soviet's association of private property. But Herr Hitler's private speeches, frankly are not trusted in Eastern Europe today and friendship pacts have little force unless the spirit of friendship is behind them. Russia, naturally, cannot forget what has been done to the Communist party in Germany and may be only biding her time.

Meanwhile she has obtained valuable assurances of non-aggression from her neighbors, from France and from Italy. Now, if she could only obtain diplomatic recognition from the United States her success would be overwhelming. M. Litvinov, during his London visit, is supposed to have

Market Losses are Unjustified

A good many people have been given a severe lesson during the past few days, a lesson which apparently they failed to learn during these years of depression. The alacrity with which the people of Canada, as more correctly, some people of Canada—sprang back into the attitude of 1929 at the first appreciable sever blow in the market delivered a severe blow to those idealistic persons who imagined that the experiences we have had changed our nature.

One important fact must be kept in mind. The public were warned by the newspapers that it was a gamblers' market. As a result all the people who found themselves facing losses due to a thirty cent drop in wheat in colloquial language had it coming to them.

It is, of course, preposterous that the price of any basic commodity, obeying the fluctuations of supply and demand, should increase or decrease by thirty per cent. within a few days. And those who bought wheat and held on to it as it made sensational advances must have realized that they stood to profit, or to lose, not as a result of the working of economic laws but because of some basically artificial market condition.

There is very little that we can suggest in the way of remedy. For some the remedy has been drastic, but simple; they have simply lost their money. For others they should serve as a useful example. For the rest, all we can hope for is a greater degree of sanity in the future—a hope which is somewhat forlorn.

Exchanges might help, however, by publishing from day to day detailed accounts of the long and short position of wheat, in order to encourage a more sane investment policy among the general public. Indeed by doing this exchanges might, in the long run do themselves incalculable benefit by killing wild investment and averting the drastic restrictions which an orgy of wild investment would undoubtedly bring about.

Death of John W. Lindsog

It is our saddest record this week the death of little Johnny Lindsog. Johnny was taken suddenly ill and was taken to Lacombe hospital Monday where he underwent an operation. It was found that he was in a very bad condition, and from the start little hope was held out for his recovery. He died yesterday (Wednesday) morning at 5:00 o'clock. A well-liked, cheerful boy, he will be greatly missed here. The Western Globe wishes to join with the others in town and district in expressing our deepest sorrow and regret at the passing of this manly little fellow.

"Gone But Not Forgotten"

Contributed by His Friends

The words cannot express the public regret in the death of Johnny Lindsog, of Lacombe. A lad of 14 years, well known, well respected, bright, and ever willing to do whatever was asked of him.

He was a fourth grader with as good as a pupil in Lacombe High, always rating from 1st to 4th position in all grades, this year passing Grade 10 with honors. He was a member of the Trail Rangers and he ably took over the duties of Secretary for a good while, and was also one of the outstanding members.

He was known not only in the town but all over the surrounding districts as "Johnny the Paper Boy". He was carrier for the "Albertan" for the kindster and generous, and he could always be depended on for a love and a bright smile to boot. He loved sports and as a baseball fan there was no boy of his age could tell you more or who knew more of the game than Johnny. From the Big League down to our Central Alberta League here. You could always tell Johnny by his continual witticisms and he always had a smile for everyone.

The writer cannot express his and the district's feelings on learning of Johnny's death and feels that enough cannot be said for the sterling qualities of Johnny, but feel that "Johnny" will pass the next grade with still flying colors and although we think it hard, yet perhaps he has a greater work "Up There".

We all wish to extend to the family the deepest sympathy of the youngest child to the oldest person in the district, and many have expressed the words "It's hard to believe it." But, no matter how the time passes "Johnny" will always be remembered as "Our Johnny the Paper Boy."

John Walter Lindsog was born at Moncton, in the year 1919, and later moved to Lacombe where he has since resided, his father being employed as section foreman here.

William Irvine, Federal member for Western Alberta, was in town on Monday in Lacombe on August 9, subject p.m. in United Church Hall, Subject: "The Present Crisis and the Way Out." Questions and discussion are invited. Everyone come.

MR. BENNETT PLAYS IMPORTANT ROLE

Reports from London agree that the Canadian prime minister has played an important role at the Economic Conference. It was largely due to him an adjournment did not follow dispute between France and the United States over currency stabilization. He insisted that the conference could carry on the discussions on secondary subjects on the agenda, and he helped to allay the anger that had developed among certain delegates. By his successful intervention in preventing the sudden breaking up of this international gathering, he not only added to his own prestige, but he brought valuable advertising to the country he represents.

MADE IN CANADA

Morrison - Johnston Limited, Lacombe

begun negotiations in this direction. But when approached for a statement on the subject a claim was not more silent than he.

The World's Grain Show.

From the beginning of time man's chief concern has been the obtaining of food to sustain life, and particularly that item of food which we have come to term the staff of life, bread. All down through the ages man has grown grains which, at first, by means of the crudest of methods he crushed and converted in a kind of flour. In the early years of the world's history wheat was recognized as the most acceptable of all grains for flour making purposes, the most highly prized of all grains. Five thousand years ago wheat has been a vitally important factor in the life of the human race. If there was a lack of it famine faced the people. Thus back in the days of Joseph the first storage elevators were built in order, in years of plenty, to provide for the lean years which always have come and always will come.

The growing, storage, transportation of wheat was a problem in those far off days, and it is one of the world's greatest problems today after the passage of thousands of years. It is engaging the attention of the statesmen of the world assembled at the World Economic Conference in London, England; it is the reason for the World's Grain Exhibition and Conference which opens at Regina on July 24. Rise and fall in the world supply and world prices of wheat is one of the great trade barometers of the world. Prices of other commodities fluctuate as the price of wheat fluctuates.

Therefore, the World's Grain Exhibition and Conference at Regina is an event of outstanding importance, and of particular importance to Canada as one of the great wheat producing and exporting nations. It is not a grain exhibition, nor a Saskatchewan exhibition, nor a Canadian exhibition, but a world exhibition in every sense. But of all sections of the globe none is more vitally interested in its success than the prairie provinces of Canada, in the very heart of which it is being held, and held at what may be regarded as a crisis in the history of the world's oldest and most important industry.

Years of planning and organization effort have been devoted to making this World's Grain Exhibition and Conference a notable event. As a result, it will undoubtedly prove to be one of the greatest world exhibitions devoted to a single phase of human endeavor ever held. While wheat will occupy the foremost place because, as already stated, it is the foremost grain in the economic life of the world, every known variety of grain will be on exhibition and in competition. Many tons of exhibits from a score or more of nations and from all continents, including comprehensive and representative national exhibits as well as the competitive exhibits, will be attractively displayed in the largest grain exhibition building in the world, built specially for this great show. This building contains several acres of floor space, and actually miles of frontage of exhibits.

This building in itself alone will repay a visit to this world exhibition. The scheme of decoration is unique. The interior of the huge structure is completely decorated in grains and grasses and seeds of every kind, description and color. It will be a veritable blaze of light and color, with huge colored transparencies, the largest in the world, specially constructed in England, and interesting devices too numerous to enumerate.

Apart from the exhibition proper, the conferences to be held on every important subject related to grain growing, financing, storage and transportation, and participated in by the leading experts and agricultural officials of governments the world over, will be of such a high educational value that people as deeply interested as Western Canadian farmers are, cannot afford to miss them. Such subjects as Present World Situation and Trends, World's Wheat Surplus, Retarding and Controlling Production, Financing World's Wheat Surplus, World's Import Cereal Requirements, World's Wheat Import Standards, Merchandising Methods in Grain Marketing—Can Improvements Be Expected? Greater Economy in Transportation and Storage of World Export Grains, Livestock—Its Place in Marketing Grain, and many others, will be discussed by men who are familiar with their subjects and who can speak authoritatively on them.

Morning sessions of this great world conference will be held in the Armories, located in the exhibition grounds, a beautiful building capable of seating 4,000 people comfortably. Afternoon sessions will take the form of joint meetings of various technical societies and groups, and will be held in Regina College and adjoining buildings.

As an exhibition city, the capital of Saskatchewan will be looking its best as the citizens are vying one with another, as well as working untidily through various civic bodies, to beautify and decorate the city for this memorable occasion.

And there will be ample accommodation for all who may come. In addition to a "tent city" of 2,000 tents, with all sanitary conveniences, erected adjacent to the exhibition grounds, thousands of city homes are being thrown open to exhibition guests and visitors, every room has been inspected, classified, rated and listed, so that people will know just what they can obtain and where and at what price.

Inasmuch as this World's Grain Exhibition is being held in conjunction with the annual Saskatchewan Provincial Fair, which has been greatly enlarged this year, and all within the same grounds, visitors will enjoy the advantages not only of the World Show but of the Provincial Fair as well, with all the varied attractions and amusements it will have to offer.

Western Canadians wishing to see a World's Exhibition have in the past always had to travel long distances and go to great expense to enjoy such a privilege. This year a World's Exhibition, and one in a class by itself will be in progress right in their midst. It is an opportunity that comes but once in a lifetime, and every person resident in the three prairie provinces who can possibly do so should take full advantage of it.

T.B. Infection

New Substance Reported Being Made To Determine Presence Of Tuberculosis

Research workers of the National Tuberculosis Association are perfecting and will shortly give the world a new substance to determine accurately the presence of tuberculosis infection in man, the Toronto Telegram said it has learned.

"This substance, it is understood, will contain no foreign elements other than the purpose of which is to indicate diagnostically the presence of infection," the newspaper said. "It has as yet been given no name and is not ready for commercial distribution."

Among the foods eaten in Hawaii are seventy different kinds of seaweed.

Motor roads in the world now total 6,665,000 miles.

Weakening Diarrhoea Dangerous Dysentery

Diarrhoea and Dysentery do not need to run for any length of time until the whole system is weakened and debilitated. Few other diseases so quickly undermine the strength and bring about a condition of weakness and often collapse.

Dr. Fowler's Extract of Wild Strawberry is not only powerful and effective in checking the looseness of the bowels, but at the same time it strengthens, stimulates and tones up the system.

Never be without a bottle of Dr. Fowler's. Always be prepared in case of emergency.

Wheat in Two Countries

United States May Have To Import From Canada This Year

If the crop experts are correct in their predictions the United States will have to import wheat before the 1934 crop is harvested—and Canada has wheat for sale.

United States Government reports estimate total production for the present year at 603,000,000 bushels. Normal consumption is 620,000,000 bushels, and usually there are heavy exports, shipments to territories and insular possessions. Winter wheat is down 250,000,000 bushels from the average and spring wheat is "below normal."

At the same time, Canadian Government officials reported that in Saskatchewan and Manitoba crop prospects were "notably better" than a year ago, and in Alberta only very slightly below the corresponding date of '32.

On the basis, then, of present expectation, the United States will be off the export market for the next year, and in addition will have to import a considerable quantity of wheat. This situation should react to the distinct advantage of Canada, which goes into the new crop year with a heavy carry-over and the best outlook in a decade for a heavy and well-distributed production. Dollar wheat may not be so far away as it has seemed.—Ottawa Journal.

Concord Farmers Like Crows

Believe He Is Friend and Pays For His Keep

Uncle Sam's experts and states of Massachusetts and Maryland may be again "em," but New Hampshire is a friend of the crow.

The farmers of the Old Granite state will have none of the new-fangled coal tar solutions for soaking seed corn and peas just to give Jim Crow the colic.

They believe the crow is a friend of the farmer. He may steal a few kernels of planted corn, but most of the time when he is scratching in a field, he is probably digging for bugs, farmers here claim.

The damage they do is exaggerated, at least Commissioner of Agriculture Andrew L. Felker believes it is.

"Generally speaking, New Hampshire farmers aren't upset much over crows," he said. "We'll hear 'em cawing for many a springtime yet, and when they come over the fence beyond all patching, we'll stuff them with straw, put a sugar bag head on top and have us a scarecrow for old time's sake."

"They pay for their keep by the insects they eat."

Influence Of Women

Thinks Conditions Would Be Much Better If World Was Guided By Women

"There is one thing which I am absolutely positive," said C. P. Howard, Indianapolis, in addressing the annual banquet of the Ontario and Quebec Conference of Typographical unions, at Toronto. "If women controlled the unions and politics of the world we would have millions unemployed, nor would we have hundreds of thousands starving while we have plenty to eat."

The influence of women, he said, "has kept men from being worse animals than they are."

President Franklin D. Roosevelt, he said, was the greatest dictator the world had ever seen. "You may take Stalin of Russia, Hitler of Germany, or Mussolini of Italy—none of these has the power of the president of the United States."

Date Hard To Determine

Original Christmas Day Could Not Have Been In December

Although students of Biblical chronology have gone far towards determining the actual date of Good Friday—probably April 6 in the year 33—of our era, it is hardly that the real date of the original Christmas Day will ever be determined.

We may be reasonably certain however, that it was not December 25, since that date occurs at the height of the rainy Judean season, when shepherds would certainly not be watching their flocks by night.

In the early days of Christianity the feast was kept up at various dates in January, April and May; and it was not until the fifth century that December 25 was agreed upon, probably from a desire to supplant the Saturnalia, from which pagan feasts, however, several Christmas customs originated.

Rations For Fifteen Years

The San Quentin Bulletin turned to statistics long enough to report one prisoner had kept track of all the food he had eaten in 15 years as an inmate of a California prison. His record shows 2,157 hamburger balls, 32,850 slices of bread, 4,975 cups of tea, 9,500 cups of coffee and 270,000 beans, the latter item averaging 50 beans a day.

Likely A Chicken Dinner

Mr. and Mrs. Edwin Bird entertained the following relatives at Sunday dinner: Mr. and Mrs. Loren Buzard, Mr. and Mrs. Kenneth Bird, Mr. and Mrs. Eugene Crane, Dale Bird, Mrs. and Mr. J. J. Bird, and the guests live in the Eagle neighborhood near Hopkins, Missouri.

The World Of Today

Speech By General Smuts At A Dinner At Rhodes House, Oxford

After the War people spoke very lightly about a world fit for heroes, but they had since had occasion to laugh at that idea. Yet the world into which the Rhodes Scholars were entering was a world that offered possibilities for great adventure, and such a world was fit for heroes. The old days of comfort, peace, and security, and of golden rules to live by were dead and buried, and those now going out into the world would find it full of danger.

We have had our chance and perhaps we have made a mess of it. Perhaps only demi-gods could have struggled with success through the trials we have had to endure. I hope you may have more success than we have achieved in the age through which we have lived. The world is becoming much harder to live in, but it may be in many ways a better world.

I have a feeling that you will find it a friendly one at bottom. We think so much today of the antagonism of race to race, yet nothing has impressed me more in recent years than the goodwill that universally exists among the peoples of the world. This friendly feeling is universally diffused among the nations, but somehow it has not found expression under the old system of society which we have inherited from the past.

Britain's Monster Clock

Minute Hand Is Huge Grid Seven-Ten Feet Long

A remarkable clock just erected on the Grand Buildings, Trafalgar Square, London, England, is claimed to be the largest in the British Empire. Its face is 759 square feet in size, whilst Big Ben is only a little of 400 square feet. The minute hand is really a huge grid 17 feet long. The clock is illuminated day and night by neon and the size of the largest letter is 8 feet 9 inches, the smallest being 2 feet 6 inches. Nearly 600 feet of neon tubing was used in making the letters, and the electrical connection required 99 1/2 miles of wiring. The clock mechanism is contained in a box only 3 feet wide, one foot from back to front and 18 inches high. The clock, synchronized with Greenwich, never requires winding, being worked directly by electricity, being wounders now set their own watches by it. Over 14 tons of steel were used in the construction of this tremendous timepiece. The clock was erected for the proprietors of a patent medicine.

Not Greatly Impressed

English Post-Artist Does Not Like Eiffel Tower

The birth centenary of Eiffel, builder of the famous Paris tower, recalled to a Liverpool Post writer this story concerning William Morris: During the English poet-artist's last visit to Paris he spent much of his time in the Eiffel Tower restaurant, having all his meals and doing all his writing there. "You must be very impressed by the tower," a friend remarked to him. "Impressed!" cried Morris. "I stay here because it is the only place in Paris where I can avoid seeing the thing."

Fewer Marriages

Hard Times In United States Lowers Marriage Rate

A new all-time marriage low of only 7.87 marriages for each 1,000 of population was set in the hard times year of 1932 in the U.S. For the first time in 21 years, the number of marriages in the United States fell below the 1,000,000 mark. There were only 981,759 in the year, a 7.5 decrease from the year before. Annual marriage rate statistics date back to 1887 and in all that time the rate has never before fallen below 8.5 per cent. per 1,000.

Manitoba Sugar Beets

In 1931 an experimental crop of sugar beets on a small acreage in the Emerson district of the Province of Manitoba gave such encouraging results that over 200 acres were planted in 1932. The total crop of 1,687 tons was shipped to Grand Forks, North Dakota. This year over 300 acres are now to be planted and a sugar factory may soon be built in the district.

Clock Has No Dial

A church clock at Lullington, Staffordshire, England, although it has neither dial nor hands, is said to have kept good time for nearly 400 years. It strikes the hours only. Rudely fashioned between oak beams, the mechanism is actuated by two heavy stones attached to ropes which run over pulleys in the belfry 30 feet above.

For Five Complete Sets of Poker Hands

You can obtain a pair of first quality Ladies' pure thread Silk Stockings, 45 gauge. Combined with excellent wearing qualities, these Stockings have the dull, sheer appearance which is so desirable, and they are obtainable in the latest shades. Sizes 8 1/2, 9, 9 1/2, 10.

There is genuine economy in rolling your own with Turret fine cut, as you can make more than 50 cigarettes from a 20c. package.

It pays to "Roll Your Own" with TURRET FINE CUT CIGARETTE TOBACCO

SAVE THE POKER HANDS

New Clock Very Accurate

Master Timepiece Will Not Vary Second In Five Years

A master clock that will not gain or lose one second in five or six years was described before the 218th meeting of the Physics Club of New York by O. H. Caldwell, former Federal Radio Commissioner. The clock was completed recently in Washington by engineers of the United States Government and will be installed at the Naval Observatory there to regulate all official clocks and correlate over government radio stations. In short, the new timepiece will set the pace for all activities ashore and afloat.

The clock operates on a unique principle. A slender bar of crystal quartz a few inches long is suspended in an air chamber, in which the temperature is kept constant to within a few hundredths of a degree. The arrangements of the quartz bar in the chamber is such that air vibrations react on it to produce what is called "acoustic feedback." The bar of quartz is delicately suspended on slender threads. An accuracy of one part in 100,000,000 is claimed.

"Clocks operated by other means are not nearly so accurate," said Mr. Caldwell. "Even the best pendulum timepieces have a daily error. They run fast and slow, in accordance with the attraction of the moon's mass. But the electronic clock, employing crystal, goes serenely on beating time, undisturbed by the effect of moon on earth. A clock employing such a principle is the most accurate known."

Origin Of Popular Game

Bridge Was Played In Constantinople Under Name Of "British"

Recent alterations in the laws of bridge have stimulated interest in the origin of what is now the most popular of card games. Under the name of "British," bridge was played in Constantinople in the seventies of last century. From there it spread gradually to Cairo, the Riviera, London and New York. Everywhere it went it ousted its parent game, whist. The actual first game of bridge seems to have been played at the Villa Coroni, on the Upper Bosphorus, in August, 1873. Its inventor, M. Serghiad, a gentleman of Rumanian origin, gave the name of "British" to his game. None of these four now survives. Of course, the laws of the game have been altered a good deal since then. The first formal code was drawn up in the seventies by a committee of members of a Constantinople club.

Great Boon To Outfitters

Nazi Brown Is Color Of Hour In Germany

Brown is all the rage today in Germany for everything from suits to shoes. The triumph of the Nazi "brown shirts" has given men's outfitters an undreamed-of opportunity. Everywhere they are displaying cloth and leather goods of the color of the hour, coupled with printed exhortations to all good Germans to fall in line.

"Browns are trumps!" advertises one enterprising shoe store on Berlin's busy Friedrichstrasse. His window display does not contain even one pair of black footwear.

Severe Training Methods

Victims of the Japanese army's customarily severe training methods in most extreme hot weather, seven soldiers died, 30 were prostrated and more than 100 others sent to hospitals over a recent week-end. They were felled during manoeuvres of the first division on the plains at the foot of Mount Fuji in temperature of 90 degrees Fahrenheit accompanied by high humidity.

England has 500,000 women auto drivers, and of these 150,000 own their cars.

Imports into Poland in the first seven months of this year were \$55,300,000.

Foresight Of British Soldier

Army For Great War

A hundred years ago was born near Dublin, Ireland, Garnet Wolseley, a British soldier, whose chief title to fame was that he reorganized the army, modernized its system of training, prepared it for the emergency of war and made rapid mobilization possible. But for his persistence there would have been no expeditionary force—incomparable for efficiency, it has been called—to rush to France in August, 1914. The small but well-trained British Army rendered a great service by its fighting retreat from Mons; and at the first battle of the Marne, the report of its advance into the gap between the First and Second German Armies convinced the tactics of the enemy, which believed that the British ranks had been broken and could not be reformed.—New York Times.

Prepare For Immigration

Look For Resumption Of Immigration From United Kingdom

Satisfied the provincial governments of Canada will shortly desire the resumption of immigration from the United Kingdom to Canada, Brigadier M. L. Hornby, of Leithbridge, Alberta, announced his intention of sailing to England to lay proposed immigration plans before United Kingdom authorities.

"I wish to make it quite clear that I am not advocating increased immigration before the provincial governments have come to consider this advisable," said General Hornby in an interview in Montreal. "What I am advocating at the present time is that we should formulate a definite plan of action without any loss of time."

For instance, there should be the acquisition of required land and the preparation of suitable farm homes.

Evolution Of Electric Lamps

New Type Is Very Different From Old Style Tungsten

Edison's tungsten electric lamp was one of the marvels of the 1890 Chicago World's Fair. A new type of electric lamp, the sodium-vapor bulb, promises to be the most significant scientific device on exhibit at the Century of Progress Fair, 40 years later. A Dutch sodium-vapor bulb exhibited at a New York scientific meeting the other night has 16 times the visibility of ordinary tungsten lamps and provides from three to four times as much light for the same amount of electricity. The new lamp produces a brilliant yellow light, said to be helpful to vision.

Sheep Require Minerals

Suitable Mixture Should Be Available At All Times

A suitable mineral mixture containing a small amount of iodine in some form should be available to sheep and lambs at all times. The following mixture is recommended by the Dominion, Quebec, Nova Scotia, P.E.I., and Ontario Departments of Agriculture: Salt, 50 lbs.; sulphur, 2 lbs.; oxide of iron, 1 lb.; ground limestone, 20 lbs.; potassium iodide, 1/2 lb. to 1 ounce. This should be mixed and placed in a self-feeder box from which the sheep may be able to help themselves, or, two pounds of the mixture may be fed with each 100 lbs. of grain.

May Be Fall Session

The parliament of Canada, which ordinarily meets early in each year, may be called together this fall if there are developments at the World's Economic Conference which demand its sanction. Last fall parliament met to put into effect the conclusion of the Imperial Economic Conference.

Prince Opens Bridges

The Prince of Wales opened three new bridges over the Thames, driving over each one at Chiswick, Twickenham and Hampton Court, and the gala ceremonies wound up with a tea on the Hampton Court Bridge and Hampton Court Palace at which nearly 1,000 guests were present.

Planning Unusual Flight

Cobham May Attempt Great Refueling Trip To Australia

Famous Sir Alan Cobham and Squadron Leader Helmore are proceeding methodically with the flying trials of a new single-engined monoplane in which later this year they may attempt to fly 10,000 miles non-stop. Probably to Australia. They plan to have the plane refueled in flight from "tanker" aircraft. Power will ascend to meet it from five or six aerodromes along the way. Thus the need to carry an enormous load of fuel at the start is avoided.

For ordinary commercial use the airplane is intended to carry pilot, four or five passengers and luggage. Equipped for the proposed long distance flight it will have seats for the two pilots only, the remainder of the disposable load being represented by approximately 280 gallons of fuel, sufficient for about 26 hours' cruising at 130 to 140 miles per hour. Power is derived from a single 245 horsepower Armstrong Siddeley "Lynx" air-cooled engine. A Townsend ring-coupled around the engine is responsible for a gain of 15 miles per hour over the speed attained with an uncoupled engine.

If Cobham and Helmore make for Australia and have good luck, they should reach the Australian mainland from England in less than four days.

Increase In Exports

Shipments To United Kingdom Show Heavy Increase During Past Year

An increase of nearly \$30,000,000 in the exports of Canada to the United Kingdom for the 12-month period ending May 31, 1933, is shown in the leading commodities as compared with the same period of 1932, according to a statement issued by Hon. H. H. Stevens, Minister of Trade and Commerce, recently. For the year ended a month ago total exports of leading commodities to Great Britain had a value of \$108,078,782, while for the corresponding period of a year ago the value of these was \$78,961,244.

The largest increase in value was wheat, which, at \$65,744,808 this year, was more than \$25,000,000 greater than last year.

The value of bacon exports increased from \$1,613,029 to \$2,855,028; of barley from \$1,407,099 to \$2,810,242; of hams from \$1,574,614 to \$2,782,862.

An increase of nearly \$1,000,000 was shown in timber exports.

Jewry Repeated History

Jewry repeated its history—sorrows, triumphs, strivings—in a gigantic Biblical spectacle, "The Romance of a People." The massive pageant, in Chicago, with a cast of 3,500, by chant, song, dance and word, presented a picture of the Jews through the ages and projected the hopes of the Jews for the future—Palestine rebuilt. It was estimated 150,000 persons attended.

New Kind Of Food

Sweet Young June Bride: "I would like a mess of slumps, Mr. Colelaw." Grocer: "Slumps? I don't quite understand what you mean." Bride: "Why, I hear my husband say there were fresh slumps in the market and I wanted to surprise him by having some for dinner."

Jacob Schneider, Swiss sausage maker of Baraboo, Wisconsin, holds two diplomas in his trade and can make 84 kinds of sausage.

IN UP-TO-DATE STABLES

—Old Reliable Minard's

When horses come in to stable with wire-cutter or saddle bolts, or crows have cut under the thing to do is get the Minard's bottle on us, as Mr. D. W. of Glenora, Manitoba, knows.

"I like your Minard's Liniment. Like to have it in the house. I have found your Minard's Liniment especially good for barbed wire cuts on horses."

A family doctor prepared Minard's Liniment over 40 years ago. Still available in every stable and every house.

AN ANSWER TO THE SCPTICS

Wiley Post has earned the congratulations of the world. The first man to fly solo around the earth, he succeeded in breaking the record made by himself and Gatty. His achievement ranks with the greatest in the history of aviation.

There are some who shrug their shoulders. "What is it all worth, anyway, they wonder. It would be so much more intelligent to fly around the world in easy stages, waiting at each point for the best possible weather, passing by, take observations which may subsequently prove useful in the founding of commercial air routes, approaching the whole problem in a rational and unharried manner."

There is an answer to such scepticism, but we are not quite sure that we can give it. If we were really living in, let us say, Aldous Huxley's Brave New World, no doubt such a feat as flying around the world (supposing it had not already been accomplished in the barbaric past) would be encompassed in a completely rational and intelligent manner—just as sumptuous meals would be swallowed in the form of concentrated pills and children would emerge from laboratories exclusively intended for the emergence of children. Unfortunately—or perhaps most fortunately—we are not living in any such brave world.

We are living in a world where the delights of the table linger on, where our chaotic lives are filled with contrasts that make them worth while a world still full of the uncertainty of love and of all human achievement. As long as we continue to live in that world, so long will our enthusiasm be fired by what is reckless and gallant and not a little insane. And as long as our world remains the imperfect thing it is today, so long will we yearn for that fire of magnificent insanity which lights the humdrum lives of men. Wiley Post carrying his way out of great cities, turning the nose of his plane into the lonely mists of northern seas, dropping from the sky into the wild spaces of the earth, racing against time from dawn to dusk and to dawn again is something of a light in our darkness.

For, though dull old gentlemen with test tubes may be remodeling our civilization for us, and banishing all these irrational emotions which distress us today, we ourselves cannot appreciate the questionable service they are rendering us. The past with its stirring uncertainties, its restlessness, its failures and its triumphs, is too great for us.

PASTOR H. FRED HARGREAVE'S PUBLIC SALE

SPRUCEVILLE NEWS

Remember the dance to be held in the hall on Friday, August 11th. Good music.

Mr. and Mrs. Arthur Kettel gave a wedding dance in the hall on the 19th. A very large crowd was present and everything was handled in a very satisfactory manner, everyone having most enjoyable evening. After lunch, Mr. and Mrs. Kettel were presented with a basket of gifts from the U.F.W.A.

The regular night meeting of the U.F.A. and U.F.W.A. will be held in the hall on Tuesday, August 1st. Mr. Jack May, wheat pool delegate will address the meeting. A director is expected to be there also.

Mr. and Mrs. J. B. Crocker left on Wednesday to visit their daughter, Mrs. Miller, at Irma, Alta.

Mr. and Mrs. Jack Smith, (nee Miss Nellie Crawford) were the recipients of many nice gifts last Tuesday evening when a shower was held in their honor by the community. Dancing was the order of the evening and a very pleasant time was had.

The Junior U.F.A. have decided to put on a picnic social and dance in the near future. This will be good, so watch this column for further particulars.

Mr. and Mrs. Sheppard have been visiting with Mrs. Sheppard's parents, Mr. and Mrs. Proudfoot.

Mr. and Mrs. Barrows and Mr. and Mrs. Walker motored to Buck Lake last Sunday.

A number of the ladies of the district are leaving Thursday to spend a few days at the United Church camp.

LINCOLN NEWS

Both young and old turned out in full force to the Lincoln Community Pic Nic at Wilson's Beach on Friday last. The Sports Committee is to be congratulated on the way they handled the races, and wish to thank Mr. E. M. Murray for the prizes he donated. The ladies in the booth were kept busy dishing out the ice-cream and sweets. In the evening the merry-makers wandered to Lincoln Hall and danced till 11 p.m. hours, the music supplied by the Meadowlarks being very good. Every one went home quite happy, feeling they had spent a day and evening of real sport.

Mrs. Anderson and family, of Calgary were visitors with her sister, Mrs. Clarence Eadie, last week. Miss Mary Schilling is spending a

few days with Misses Reta and Kathleen Saunders.
Miss Gladys Lorimer spent the week end at Mr. and Mrs. Jno Bradleys.

Miss Edith Thompson and Miss Lucy Howe, of Lacombe, were visitors at H. R. Dools over the week end. There was a real game of Soft Ball at Jim Morris' last Sunday, Lincoln and Sunny Crest. The game ended 8 to 7 in favor of Sunny Crest. Keep in mind the big baseball tournament at Henry Kamla's on August 2nd. There will be baseball teams from all around, so be there and boost for your home team.
Bring your friends and come to the dance in Lincoln hall, Aug. 4th.

DeLaval Separators, priced \$48.00 up at Morrison & Johnston, Ltd.

The best Beach Regatta held in years took place at Gull Lake on Wednesday. Large lists of contestants were entered in every event. In some of the contests over 14 canoes took part. A large crowd from the beach and other points were on the pier to witness the contests and all report a wonderful day of water sports. The Committee in charge of the Regatta deserve the highest praise for the efficient arrangements made—every number on the program was run off without any delay. A full account of prize winners will be published next week.

We had the pleasure last week of meeting in Lacombe one of the district's real old timers, in the person of Mrs. Green, of Morningside, who although in her ninety-fifth year is still hale and hearty, and takes an active interest in everything that is going on around the district. Accompanying her was Mr. Roy Flegel, a son-in-law, and Mrs. Ed. Barnett, formerly of Lacombe but now of Stettler. It is a pleasure to talk

to Mrs. Green, and she can tell many interesting stories of the early days here and in the old home. Her friends wish her many more years of health and happiness.

NO GUARANTEES ON BINDER TWINE

Edmonton—The provincial government has no intention of going into the binder twine business at present, declared Premier J. E. Brownlee on Thursday when asked regarding a statement to this effect by A. B. McKay, general secretary of the Alberta Retail Merchants' Assn. "I have said," continued the premier, "that if the government continue giving guarantees so as to take the risk, we would take over the whole thing as a monopoly. But our present intention is to get out of the guarantee giving business."

WORLD HAPPENINGS
BRIEFLY TOLD

The Canada-South Africa trade agreement, negotiated during the imperial economic conference in Ottawa, last summer, has become effective.

The world disarmament conference has been adjourned to Oct. 10 despite a protest by Rudolph Nading, Chancellor Hitler's representative, that the long recess amounted to a first-class funeral for disarmament.

Approximately 2,500 single unemployed men are in Vancouver receiving no assistance from either city or province because of their refusal to go to relief camps or because they left these establishments.

E. L. Bushnell, director of radio station CKMG, Toronto, has been engaged by the Canadian radio broadcasting commission to make a tour of the western provinces to organize programmes from this area.

Detention for 28 days was the sentence meted out to Guardman Harris, sentry at Windsor Castle, following a court martial. Harris was found asleep at his post while the royal family were in residence some time ago.

A plea for an even greater measure of co-operation between all nations in the fight against tuberculosis was made by Professor S. Lyle Cummins, of England, noted authority on the disease, at the annual dinner of the National Tuberculosis Association held in Toronto.

Dr. John M. Chapman, associate professor of banking at Columbia University, in an address before the round table on money, banking and financial situation, at the Institute of Public Affairs, said that the United States "bank failure movement is not ended."

"Seven speedy destroyers used by the United States coastguard for years to chase rum runners and other smugglers operating off the Atlantic coast have been returned to the navy because the government's economy programme necessitated a reduction in expenditures.

Has His Own Method

British General Taught Himself Eight Or Nine Languages

Leutenant-General Sir Edmund Ironside has excelled what was practically a shrewd at the Tower of London, England, for an active part by his new appointment as Quartermaster-General of the Forces in India. As the youngest general officer in the British Army for many years—still less than fifty-four years old—he will now have an opportunity to use his keenest to the full. He taught himself the eight or nine tongues he knows by a method of his own, memorizing every day a score of nouns and adjectives. Verbs come in their own good time, and if he is ever at a loss for one, he bridges the gap by an eloquent gesture and carries on calmly with the nouns.

Learning To Work

Many Opportunities On Farm To Learn Use Of Head And Hands

During the long summer holidays boys on the farm can find plenty to do learning to work, and it is very important that opportunities should be found for them. Boys need to be able to use their hands expertly as well as their minds. If not they will find the road rough and steep at the outset of life. Girls have the chance to learn to work in their homes, under the direction of their mothers, the best of all teachers. Of course a boy should have some time to play, but idleness is a great stumbling block in the way of life, and is a surer road to death than work.

Selling Wheat Abroad

Almost Sixty Countries Purchased From Canada Last Year

Canadian wheat last year was sold to almost 60 countries, made up of 20 within the empire and the balance beyond empire boundaries. Of the total of 140,000,000 bushels to empire ports no less than 135,000,000 bushels went to the United Kingdom.

France and Belgium purchased each about 14,000,000 bushels. Italy and the Netherlands together accounted for 21,000,000 bushels; China and Japan, 13,500,000 bushels; Germany, 6,000,000 bushels; and Greece, 5,000,000; Norway, Sweden and Peru purchased about 1,000,000 bushels each.

Caught Albino Robin

An albino robin—white feathers, pink eyes and all—was caught by Mrs. George Hibbard in the yard of her home at Niagara Falls, New York. She was attracted to it when a score of other robins gathered about it in her yard chirping excitedly.

We are not very well up on these new theories, but we feel strongly that one of the chief troubles with the price system is not having the price.

Industrial activities in Sao Paulo, Brazil, are increasing.

More than 1,250,000 radars sets were sold in England last year.

Canadian Authors Tour Britain

Party Of Fifty Will Visit Literary Centres Of The British Isles

Following the annual convention of the Canadian Authors' Association which this year was held in Quebec City, a party of about 50 Canadian authors and their friends sailed (July 1st) on the "Impress of Britain" for a tour of the literary centres in the British Isles. They will be met by some of the most distinguished authors of Great Britain and will experience the advantages of personal contacts with the scenes depicted in English literature including the country of Hardy's "Tess," the spot where Keats wrote "Ode to the Nightingale," Westminster Abbey, Dr. Johnson's house, the inn made famous by Sam Weller, Stratford-on-Avon, Kenilworth Castle, Wordsworth's home, the Robert Burns country, and other centres of literary interest.

Among those who, it is expected, will extend courtesies and greetings to the visiting Canadians will be Sir James Barrie, Rudyard Kipling, John Buchan, John Galsworthy, Sir Henry Newbolt, J. B. Priestley, John Drinkwater, and George Bernard Shaw.

Among those who, it is expected, will extend courtesies and greetings to the visiting Canadians will be Sir James Barrie, Rudyard Kipling, John Buchan, John Galsworthy, Sir Henry Newbolt, J. B. Priestley, John Drinkwater, and George Bernard Shaw.

The Canadian Authors' Association was organized in 1921 with a view to promoting the interests and craftsmanship of Canadian authors. It has a membership of about 800. The association has helped to disclose the very substantial contribution which Canadian writers are making to current literature—a contribution which had been almost entirely overlooked.

Due to the fact that a large part of Canada's literary production finds its way to the public through the channels afforded by publishing houses in the British Isles and the United States, with the result that numbers of well-known Canadian writers were commonly regarded as being Englishmen or Americans. During the 12 years since the association was organized great advances have been made in the Canadian publishing industry, particularly in the field of magazines and literary periodicals.

Washing Newspaper Uniforms

By Ruth Rogers

Washing newspaper uniforms is a task that requires a certain amount of skill and patience. The uniforms are often made of heavy materials and can be quite soiled with ink and other substances. It is important to wash them thoroughly to keep them in good condition.

Lighthouse Of The World

Plan To Build Earth's Tallest Tower In Paris

A proposal to erect a tower in Paris more than twice as high as the Eiffel Tower, which so distinguishes the Paris skyline, has gripped public imagination, and is being carefully studied by experts.

It would be a feature of the exposition of 1937, just as the Eiffel Tower was created for the great exposition of 1889. The new tower, according to the suggestion, would be known as the "Lighthouse of the World."

The proposed tower planned by Pers and Hughes, architects, would be 2,300 feet in height, as compared with the 1,248 feet of the Empire State Building of New York and the 964 feet of the Eiffel Tower, which until a few years ago was the highest structure in the world.

Under the plans of the architects, there would be a platform at about 1,500 feet, to which access would be obtained by automobiles climbing up a spiral slope at a rise of eight degrees, and also by elevator. Another platform would be situated at 1,800 feet, and here there would be a garage capable of accommodating 500 cars, and a restaurant which would seat 2,000 persons.

At the top of the tower would be an installation for giving air and sunbaths and the designers believe that at that altitude the weather will be a cloudless sky, would be as balmy as that enjoyed at the Riviera. A peak light would be installed at the huge and striking lighting effects would distinguish the entire structure.

Two ramps would be built for cars, with the descending ramp equipped with cables.

How To Clean Jewelry

Process Is Simple, But Care Must Be Exercised

Pearls ought always to be kept in a velvet-lined box, for this helps to preserve their color. If dust has collected between the beads rub them with a soft brush, and their lustre can then be restored by dipping them in magnesia powder.

They can be left buried in the powder for a few hours and after shaking off the powder, they should be rubbed gently with a chamois leather. Ivory beads can be cleaned by washing them in warm soapy water, then rinsing them and rubbing them, bead by bead, with a piece of cotton wool dipped in hydrogen peroxide. Leave this on for a few minutes, and then rinse and dry the beads. All metals tarnish in contact with the air, and dust soon clogs up the jewelry. Rings set with precious stones should always be removed before being washed, because water loosens the settings. You can wash gold ornaments in warm soapy water and gently rub them with a soft nailbrush. After rinsing place the ornaments in warm water to which a few drops of ammonia have been added, and finally, dry with a clean cloth.

Then polish with jeweler's rouge moistened with ammonia. Silver ornaments can also be first washed and then polished with whitening moistened with methylated spirit. No moisture must ever be allowed to touch turquoises or opals. Corals should never be washed in warm water.

Twenty-Seven-Year Old Fire

Peat Fire Lit By Scotch Couple Never Goes Out

As a lover of the older ways of Scottish life, Sir Herbert Maxwell, whose 88th birthday was celebrated upon his receipt of the Order of the Thistle, was greatly pleased recently to find that peat can still hold its own against more fashionable modern fuels. He was fishing with a friend in a moorland loch when a sudden storm drove them to take shelter in a cottage, where they asked the good wife to bake them some scones. On the hearth was a heap of white peat-ash, which, when she blew it, revealed a glow of fire beneath. How long has that fire been smoldering? Sir Herbert's friend, meaning from what hour of that morning, said the woman, "It's seven-and-twenty years since Rob and me came to this house and the fire's never been out since."

Great Masonic Gathering

Duke Of Connaught Opens New Headquarters In London

At one of the greatest Masonic gatherings which has been held in London, England, for many years, the Duke of Connaught, Grand Master, opened the new Masonic headquarters adjoining the old headquarters in Great Queen Street. The lofty tower of the new building rises above the not inconsiderable buildings of the neighboring Kingsway. There is a great inner temple surrounded by 10 acres of land, a large museum and library and extensive administrative offices. The cost which runs to well over £1,000,000, was raised on the suggestion of the Duke of Connaught just after the close of the war. The building will be a memorial both to the close of the war and to many Freemasons who fell in action.

The cost which runs to well over £1,000,000, was raised on the suggestion of the Duke of Connaught just after the close of the war. The building will be a memorial both to the close of the war and to many Freemasons who fell in action.

At one of the greatest Masonic gatherings which has been held in London, England, for many years, the Duke of Connaught, Grand Master, opened the new Masonic headquarters adjoining the old headquarters in Great Queen Street. The lofty tower of the new building rises above the not inconsiderable buildings of the neighboring Kingsway. There is a great inner temple surrounded by 10 acres of land, a large museum and library and extensive administrative offices. The cost which runs to well over £1,000,000, was raised on the suggestion of the Duke of Connaught just after the close of the war. The building will be a memorial both to the close of the war and to many Freemasons who fell in action.

At the Avalon

No more thrilling or interesting drama of pioneer days has been transferred to the screen than Zane Grey's "The Golden West," the new Fox picture featuring the always popular George O'Brien in the leading role, which begins its engagement at the Avalon Tonight. It brings O'Brien to the screen in a dual role, Janet Chandler, his new leading lady, also plays two parts. In the early part of the picture they are lovers, but a family feud ruthlessly tears them apart. In the second part of the film, a lapse of 20 years having been provided, they are again seen as lovers. O'Brien appearing as his own son and Janet Chandler as the daughter of the character she played before the time lapse.

Also showing "Humanity" starring Ralph Morgan, Boots Mallory, Alexander Kirkwood and Irene Ware. Coming Kate Smith in "Hello Everybody," Aug. 3, 4 and 5. James Cagney in "Hard To Handle," Aug. 10, 11 and 12.

BENNY STARK'S ORCHESTRA

No visit to Sylvan Lake is complete without a visit to the beautiful Oriental Gardens where you can dance to the melodies played by Benny Stark and his wonderful orchestra. This ensemble which hails from Winnipeg is one of the finest dance bands ever to visit Alberta. Dancers can depend that only the very latest and popular dance numbers are played and in the most modern manner. The orchestra is very versatile and each member is a musician of merit. Variety is one of the outstanding points about the programs played by this aggregation. From the very hottest numbers to the beautiful, dreamy waltzes, the band works as smoothly as a clockwork. Each member of the band is a master of several instruments and in this way many novel effects are achieved that would be impossible for other bands to duplicate. The Oriental Gardens has installed sound amplifiers, so that no matter how large the crowd is, the music can be heard at every point in the hall. If you would enjoy an evening of dancing, there is no nicer place to go than to the Oriental Gardens, and no finer music to dance to than the music of Benny Stark and his orchestra.

BENTLEY BARBECUE

On Thursday last, Bentley held its 2nd Annual Barbecue and Sports Day. Although rain and a very cold day greeted the holiday, everyone reports a great day. Sports of every kind were featured and some interesting games took place. The picture show in the evening was well attended as was the dance that followed.

FARM WOMEN'S WEEK AT THE O.S.A.

The fourth annual program for women at the Olds School of Agriculture has been arranged for the week beginning July 31st. This week has been greatly enjoyed in past years and applications are now being received for this year's course. A program and full particulars will be sent on request.

MOLLISON'S CRASH

Bridgeport, Conn., July 23.—Jim and Amy Mollison, who set out from Wales with hopes of being the first persons to make a non-stop flight from Great Britain to New York, crashed here tonight, within 60 miles of their goal.

After successfully crossing the North Atlantic and speeding down the New England coast, the British fliers cracked up at 9:00 p.m., E.S.T., after 39 hours in the air. Both fliers suffered cuts and abrasions on the head, legs and arms.
